**DETAILED ACTION**

1. This is the first action on the merits. Claims 1-15 are pending.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

3. The IDS, filed 12/27/01, has been considered in full.

***Drawings***

4. The drawings, as originally filed, are acceptable as formal.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 3 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 3 and 14, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Art Unit: 3682

The use of "or" is alternative and it is not clear which Applicant is claiming.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 29 05 130 A1.

DE 29 05 130 A1 shows a steering column which utilizes expandable portions (Figure 1, 8) which hold two tubular members together.

9. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by German Patent Document G 91 11 065.3.

German Patent Document G 91 11 065.3 shows a steering column (figure 3) protrusions (inboard of reference number 21) are used to secure two tubular members together.

10. Claims 1-10, and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomas (5,879,099).

Thomas shows a connection between two tubular members where an inner member (15) is inserted into an outer member (12) and subsequently pressure is applied causing a plastic deformation of the inner member into recesses (e.g. 19).

### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brandenstein et al.; Schneider ; Kinney et al. ; and Lauk et al. show arrangements for securing two members by deforming one of the members into the other.
